

## Contents to Volume 120 (2000)

### Volume 120, No. 1, January (I) 2000

Brendan Hassett: Special Cubic Fourfolds	1–23
Ben Lichtin: On a Question of Igusa: Towards a Theory of Several Variable Asymptotic Expansions: I	25–82
J. Pesenti et L. Szpiro: Inégalité du discriminant pour les pinceaux elliptiques à réductions quelconques	83–117

### Volume 120, No. 2, January (II) 2000

Yasushi Kajihara and Masatoshi Noumi: Raising Operators of Row Type for Macdonald Polynomials	119–136
Arnaldo Garcia, Henning Stichtenoth and Chao-Ping Xing: On Subfields of the Hermitian Function Field	137–170
M. Boggi and M. Pikaart: Galois Covers of Moduli of Curves	171–191
H. P. Schlickewei and W. M. Schmidt: The Number of Solutions of Polynomial-Exponential Equations	193–225

### Volume 120, No. 3, February 2000

Magdy Assem: Remarks on the Transfer Factors for Unipotent Orbital Integrals in $p$ -adic Classical Split Groups	227–290
Freydoon Shahidi: Poles of Intertwining Operators via Endoscopy; the Connection with Prehomogeneous Vector Spaces With an Appendix, 'Basic Endoscopic Data', by Diana Shelstad	291–325
Ku Yong Ha, Jang Hyun Jo and Jong Bum Lee: Free Group Actions on Spaces Homotopy Equivalent to a Sphere	327–333
Author Index, Volume 120 (2000)	335
Contents to Volume 120 (2000)	337

the 'information' and 'communication' fields, and the 'information science' field.

It is important to note that the 'information science' field is not a new field, but a field that has been developing since the 1960s. The 'information science' field is a field that is concerned with the study of the nature and use of information, and the development of methods for the collection, organization, storage, retrieval, and dissemination of information. The 'information science' field is a field that is concerned with the study of the nature and use of information, and the development of methods for the collection, organization, storage, retrieval, and dissemination of information.

The 'information science' field is a field that is concerned with the study of the nature and use of information, and the development of methods for the collection, organization, storage, retrieval, and dissemination of information. The 'information science' field is a field that is concerned with the study of the nature and use of information, and the development of methods for the collection, organization, storage, retrieval, and dissemination of information.

The 'information science' field is a field that is concerned with the study of the nature and use of information, and the development of methods for the collection, organization, storage, retrieval, and dissemination of information.
